-----<START OF DOCUMENT>-----

Occasionally, the @icloud.com email servers will start rejecting emails from your domain. This is an antispam measure and, while frustrating when it happens, it does mean @icloud.com email addresses remain largely spam-free.

If your domain is being blocked as SPAM, you can contact the @icloud.com postmaster team by via email;

Send an email to icloudadmin@apple.com with all of the following information:

- Your company name
- Your email domain
- The IP addresses of the affected mail servers
- The SMTP errors that you're getting from iCloud mail servers
- A detailed description of the issue, including when it started
