-----<START OF DOCUMENT> -----

For some users of Outlook, the latest release of Office, you may find the navigation bar no longer reside at the bottom. Instead, the navigation bar is moved to the upper left side of the Outlook window. Some may feel it is a good update, but many may be accustomed to the old style and prefer to use that. There is a way to return the navigation bar from the left side to the bottom once more.

---

To move the navigation bar

1. Open Outlook, you can see the navigation bar is located on the upper left side:

4. In the **Registry Editor** window, navigate to the following path:

**HKEY\_CURRENT\_USER\SOFTWARE\Microsoft\Office\16.0\Common\ExperimentEcs\Overrid**

es

5. Locate and click the “**Microsoft.Office.Outlook.Hub.HubBar**” string value in the **Name** column in the right section of the page. Then set the **Value data** to **false**.

Image not found or type unknown

But in my case, the “**Microsoft.Office.Outlook.Hub.HubBar**” string value in this registry key **doesn’t exist**. So I should **create a new string value named “Microsoft.Office.Outlook.Hub.HubBar”** in this location first.

Image not found or type unknown

6. To **create the “Microsoft.Office.Outlook.Hub.HubBar” string value**, please **right-click** on the **Overrides** folder, then click **New > String Value** in the popped-up menu lists.

7. **Copy and Paste** “Microsoft.Office.Outlook.Hub.HubBar” in the text box.

Tip: If the name of the string value is not in editable mode, please right click it and select Rename from the context menu.

8. **Double-click** on the newly created string value. The **Edit String** dialog pops up. Type **“false”** in the **Value data** box. Then click **OK**.

Image not found or type unknown

Now **restart Outlook**. You will see the **Navigation bar** is **back at the bottom** of the Outlook page like it used to be.

Image not found or type unknown

Note: If you want to **restore the left-side navigation bar setting**, just **locate** the **“Microsoft.Office.Outlook.Hub.HubBar” string value** in the **Registry Editor** window, right-click on it, and click **Delete**.
