

65.027 How to configure SmarterMail on Android Mail app using IMAP

Document Control

Document Name	65.027 How to configure SmarterMail on Android using IMAP		
Version	v1.0 Current		
Author	Neil Tancock, IT Services (Safeharbour Support Ltd), neil@safeharboursupport.com		
Approval	Safeharbour Support		
Approval date	01-JAN-2025	Review date	31-DEC-2027
Abstract	SmarterMail users can sync their email to their Android Mail app by configuring an IMAP account. With an IMAP account, you will create a two-way sync between SmarterMail and the device, where all emails folders are synced. This means that when you log into the SmarterMail Web interface, actions you performed within the Mail app on your iPhone or iPad will automatically appear in the Web interface, and vice versa.		
Scope	This document applies to all clients of Safeharbour Support Ltd		
Inputs	None		
Outputs	None

-----<START OF DOCUMENT>-----

Follow these steps to configure a SmarterMail IMAP connection on an Android device

Note: We will have sent you your email hostname, username and password in a welcome email. Please have that to hand before starting this procedure. If you don't have it please contact us and we will re-send it to you.

1. Open your Android E-Mail applications
2. Select My Accounts
3. Select Add account
4. Select Email
5. Select OK
6. Enter an account name (can be anything)
7. Enter your name and e-mail address.
8. Click OK
9. If you see an option at the bottom for Manual Setup then click on it.
10. For incoming Mail Server Select **IMAP** mail server.
11. Server: **Your mail server hostname**
12. Port: **993**
13. Username: **Enter your FULL email address** (i.e. myname@mydomain.com)
14. Password: Enter your **e-mail account password**
15. Make certain you leave **SSL checked**
16. Click **OK**.
17. **For outgoing Mail Server** SMTP server set **Your mail server hostname**
18. Port: **465**
19. Username: Enter your **FULL email address** (IE:: myname@mydomain.com)
20. Password: Enter your **e-mail account password**
21. Make certain you leave **SSL checked**
22. Make certain **LOGIN REQUIRED is selected**
23. Click **OK**
24. Your IMAP Android e-mail account is now complete
